INTERNAL QUALITY CONTROL SHEET

This report has been prepared by BrightFields, Inc. (BrightFields) following standard practices and policies for the preparation of an environmental “due diligence” investigation more commonly known as a Phase I Environmental Site Assessment and in accordance with the Pennsylvania Department of Transportation (PennDOT) Publication 281, *The Transportation Project Development Process, Waste Site Evaluation Procedures Handbook*.

To assure accuracy and maintain a high level of quality, all BrightFields Environmental Site Assessments (ESAs) are subjected to an internal review procedure. This Phase I ESA Addendum was prepared and reviewed by the following BrightFields personnel.

PHASE I ENVIRONMENTAL SITE ASSESSMENT ADDENDUM FOR THE I-80 RECONSTRUCTION PROJECT

RAMP I REALIGNMENT AREA

**STROUD TOWNSHIP, STROUDSBURG, AND EAST STROUDSBURG
MONROE COUNTY, PENNSYLVANIA**

EXECUTIVE SUMMARY

INTRODUCTION

BrightFields, Inc. (BrightFields) was tasked by AECOM Technical Services, Inc. (AECOM) to perform a Phase I Environmental Site Assessment (ESA) for the I-80 Reconstruction Project (project). The Pennsylvania Department of Transportation (PennDOT) has proposed the reconstruction to enhance overall mobility and improve safety within the I-80 corridor. The study area for the Phase I ESA consisted of approximately four miles of I-80 located between Exit 303 and Exit 307 in Stroud Township, Stroudsburg, and East Stroudsburg, Pennsylvania. The study area also included proposed stormwater basin areas along the interstate, portions of Pennsylvania Route 611 (PA 611), United States Route 209 (US 209), and portions of Stroud Township and Stroudsburg, Pennsylvania. The Phase I ESA was completed by BrightFields in July 2017. In February 2019, AECOM requested that BrightFields perform a Phase I ESA on an additional area (Ramp I Realignment Area) which is the subject of this Phase I ESA Addendum (Figure 1).

PURPOSE

The purpose of this Phase I ESA Addendum is to identify existing and potential releases of hazardous substances, inquire into the previous ownership and uses, and identify other environmental concerns within the Ramp I Realignment Area. The information gathered from the previous Phase I ESA completed in July 2017 and from this Phase I ESA Addendum will be used in the final design analysis for the project and to identify potential concerns that may be necessary to address when the final design is completed. It is anticipated that additional environmental assessments will be performed during the final design stage of the project in order to provide more detailed recommendations for the identified sites of potential concern. This Phase I ESA Addendum was conducted in conformance with the scope and limitations of

PennDOT Publication 281, *The Transportation Project Development Process, Waste Site Evaluation Procedures Handbook*. This Phase I ESA Addendum included the following:

- Performing an environmental database search of the Ramp I Realignment Area and surrounding properties to identify sites that may pose environmental hazards for the project.
- Performing a site reconnaissance of the Ramp I Realignment Area and surrounding properties in an effort to identify visual indicators of potential waste disposal concerns.
- Reviewing historic topographic maps and aerial photographs in an effort to determine the past use of the Ramp I Realignment Area and surrounding properties.
- Conducting a file review at the Pennsylvania Department of Environmental Protection (PADEP) Northeast Regional Office to obtain further information for the sites of potential environmental concern identified on environmental databases.
- Evaluating the information obtained for each of the identified sites of potential environmental concern to determine if further investigation is warranted.

No sites of potential concern were identified within or adjacent to the Ramp I Realignment Area and therefore no interviews were performed for this Phase I ESA Addendum.

FINDINGS

The topographic maps and historic aerial photographs reviewed did not indicate any previous land uses of the Ramp I Realignment Area or surrounding properties that would indicate potential waste disposal concerns. Additionally, no visual indicators of potential waste disposal concerns were identified during the site visit performed on April 8, 2019 except for some trash that has been dumped in the area.

The EDR Radius Map™ Report obtained for this Phase I ESA Addendum did not identify any additional sites within or adjacent to the Ramp I Realignment Area that that could represent potential environmental areas of concern.

Several leaking underground storage tank (LUST) sites (Hoffner Oil, JC Penny 17794, Mikels Motors Inc., and Tristate News Dealers Supply Co.) were identified within a 0.25-mile radius to the north of the Ramp I Realignment Area. BrightFields submitted an informal file review request to PADEP for these sites on April 4, 2019 and reviewed the files at the PADEP Northeast Regional Office in Wilkes-Barre, Pennsylvania on May 14, 2019. The PADEP files reviewed

and information obtained from the PADEP Environment Facility Application Compliance Tracking System (eFACTS) website indicate that the Hoffner Oil site was incorrectly mapped by EDR and is actually located approximately 1.5 miles northwest of the Ramp I Realignment Area at 1550 PA Route 611. Therefore, a description of the files associated with the Hoffner Oil site is not provided for this Phase I ESA Addendum. Based on the files reviewed, the three remaining LUST sites do not represent potential environmental concerns for the Ramp I Realignment Area. No further action is required at this time. However, if these sites are disturbed during I-80 improvements, further investigation may be warranted.

RECOMMENDATIONS

Based on the findings of this Phase I ESA Addendum, no further investigation at this time is recommended for the Ramp I Realignment Area. However, as recommended in the Phase I ESA report for I-80 dated July 2017, surveys for asbestos containing materials (ACM) and lead based paint (LBP) should be conducted on any structures that will be impacted by the project.

As indicated in the Phase I ESA report for I-80 dated July 2017, there is potential for contamination to be present beneath the I-80 corridor (or adjacent to the I-80 corridor) as a result of vehicle accidents and spills. Additionally, Sanborn® maps indicate that a railroad corridor was formerly located in many areas where I-80 currently is located and there is potential for contaminated materials, including historic fill, to be present beneath I-80 and/or adjacent to I-80. After the design plans for the project are completed, a Waste Management Plan (WMP), and a site specific Health and Safety Plan (HASP) should be prepared to address soil, sediment, and groundwater management, environmental health, and worker safety during all project construction activities. The WMP should address all known or suspected contaminants that may be associated with the identified sites of potential concern as well as contaminants that may be present beneath or adjacent to I-80.

**PHASE I ENVIRONMENTAL SITE ASSESSMENT
ADDENDUM FOR THE I-80 RECONSTRUCTION PROJECT
RAMP I REALIGNMENT AREA

1.0 INTRODUCTION

BrightFields, Inc. (BrightFields) was tasked by AECOM Technical Services, Inc. (AECOM) to perform a Phase I Environmental Site Assessment (ESA) for the I-80 Reconstruction Project (project). The Pennsylvania Department of Transportation (PennDOT) has proposed the reconstruction to enhance overall mobility and improve safety within the I-80 corridor. The study area for the Phase I ESA consisted of approximately four miles of I-80 located between Exit 303 and Exit 307 in Stroud Township, Stroudsburg, and East Stroudsburg, Pennsylvania. The study area also included proposed stormwater basin areas along the interstate, portions of Pennsylvania Route 611 (PA 611), United States Route 209 (US 209), and portions of Stroud Township and Stroudsburg, Pennsylvania. The Phase I ESA was completed by BrightFields in July 2017. In February 2019, AECOM requested that BrightFields perform a Phase I ESA on an additional area (Ramp I Realignment Area) which is the subject of this Phase I ESA Addendum (Figure 1).

1.1 Project Description and Purpose of Report

The purpose of this Phase I ESA Addendum is to identify existing and potential releases of hazardous substances, inquire into the previous ownership and uses, and identify other environmental concerns within the Ramp I Realignment Area. The information gathered from the previous Phase I ESA completed in July 2017 and from this Phase I ESA Addendum will be used in the final design analysis for the project and to identify potential concerns that may be necessary to address when the final design is completed. It is anticipated that additional environmental assessments will be performed during the final design stage of the project in order to provide more detailed recommendations for the identified sites of potential concern. This Phase I ESA Addendum was conducted in conformance with the scope and limitations of PennDOT Publication 281, *The Transportation Project Development Process, Waste Site Evaluation Procedures Handbook*. This Phase I ESA Addendum included the following:

- Performing an environmental database search of the Ramp I Realignment Area and surrounding properties to identify sites that may pose environmental hazards

for the project.

- Performing a site reconnaissance of the Ramp I Realignment Area and surrounding properties in an effort to identify visual indicators of potential waste disposal concerns.
- Reviewing historic topographic maps and aerial photographs in an effort to determine the past use of the Ramp I Realignment Area and surrounding properties.
- Conducting a file review at the Pennsylvania Department of Environmental Protection (PADEP) Northeast Regional Office to obtain further information for the sites of potential environmental concern identified on environmental databases.
- Evaluating the information obtained for each of the identified sites of potential environmental concern to determine if further investigation is warranted.

No sites of potential concern were identified within or adjacent to the Ramp I Realignment Area and therefore no interviews were performed for this Phase I ESA Addendum.

2.0 ENVIRONMENTAL SETTING

The potential for downward and/or horizontal migration of any contaminant within an area is controlled by the environmental setting of the area. Details regarding the environmental setting for the project were provided in the Phase I ESA report completed by BrightFields in July 2017.

3.0 ENVIRONMENTAL DATABASE CORRIDOR SEARCH

Environmental Data Resources, Inc. (EDR) was subcontracted to provide Federal, State, and/or local agency databases in order to obtain information regarding sites that may pose potential environmental concerns within the Ramp I Realignment Area and surrounding properties. The EDR Radius Map™ Report obtained to complete this Phase I ESA Addendum is included in Appendix A. Typically, agencies maintain databases of investigated sites which are then used to identify potential environmental concerns. These databases include, but are not limited to, the following:

- National Priority List (NPL) (of Superfund sites)
- Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)
- CERCLIS No Further Remedial Action Planned (NFRAP) list
- Pennsylvania Underground Storage Tanks (UST) Sites

- Pennsylvania Archive Underground Storage Tanks (UST) Sites
- Pennsylvania Aboveground Storage Tanks (AST) Sites
- Pennsylvania Unregulated (UNREG) Leaking Tanks (LTANKS) Sites
- Pennsylvania Leaking Underground Storage Tank (LUST) Sites
- Pennsylvania Historic (HIST) Landfill (LF) Sites
- Pennsylvania Voluntary Cleanup Program (VCP) Sites
- Resource Conservation and Recovery Act Information System (RCRA):
 - RCRA Generator Sites
 - RCRA Treatment, Storage and Disposal (TSD) Sites
 - RCRA CORRACTS and non-CORRACTS (Corrective Action Sites)
- Emergency Response Notification System (ERNS)

The EDR Radius Map™ Report did not identify any sites within or immediately adjacent to the Ramp I Realignment Area that could represent potential environmental areas of concern.

Several sites were identified to the south of the Ramp I Realignment Area, however, these sites were previously evaluated in the Phase I ESA report completed in July 2017.

The EDR Radius Map™ Report identified twelve sites within a 0.25-mile radius to the north of the Ramp I Realignment Area. The sites and the regulatory databases which the sites were identified are summarized on the following table:

Site Name	Regulatory Database Listings
Abeloff Pontiac Inc.	Manifest, Facility Index System (FINDS), RCRA-Small Quantity Generator (SQG), and Enforcement and Compliance History Online (ECHO)
CVS Pharmacy #1312	FINDS, RCRA-Large Quantity Generator (LQG), ECHO, and Manifest
Mikels Motors Inc.	Manifest, Finds, LUST, RCRA-SQG, ECHO, Archive UST, RGA LUST
Aspen Dental	RCRA-Conditionally Exempt Small Quantity Generator (CESQG)
Tri State Newsdealers Supply Co.	LUST
Hoffner Oil	LUST
Pipeline Petroleum Inc.	EDR Historical Auto Stations
JC Penny 17794	LUST

Site Name	Regulatory Database Listings
Midas Muffler & Brake	Archive UST
BR Peters Corporation	EDR Historical Auto Stations
Weis Mkt	Archive UST and UST
Perry Brothers Texaco	EDR Historical Auto Stations

Information provided in the EDR Radius Map™ Report for the four RCRA generator sites (Abeloff Pontiac Inc., CVS Pharmacy #1312, Mikels Motors, and Aspen Dental) indicate that no violations of RCRA regulations pertaining to storage, transport, and disposal of hazardous wastes were identified. Based on the distance of these sites to the Ramp I Realignment Area, it is not anticipated that impacts related to these sites will be encountered.

Limited information provided in the EDR Radius Map™ Report for the three EDR Historical Auto Stations and two Archive UST sites indicates that there have been no environmental investigations or cleanup actions at these sites. Based on the distance of these sites to the Ramp I Realignment Area, it is not anticipated that impacts related to these sites will be encountered.

BrightFields submitted an informal file review request to PADEP for the four LUST sites (Hoffner Oil, JC Penny 17794, Mikels Motors Inc., and Tristate News Dealers Supply Co.) on April 4, 2019 and reviewed the files at the PADEP Northeast Regional Office in Wilkes-Barre, Pennsylvania on May 14, 2019. The PADEP files reviewed and information obtained from the PADEP Environment Facility Application Compliance Tracking System (eFACTS) website indicate that the Hoffner Oil site was incorrectly mapped by EDR and is actually located approximately 1.5 miles northwest of the Ramp I Realignment Area at 1550 PA Route 611. Therefore, a description of the files associated with the Hoffner Oil site is not required for this Phase I ESA Addendum. The files obtained from the PADEP for the remaining three LUST sites are summarized in Section 5.1 and copies of the files are included as Appendix B.

4.0 BACKGROUND REVIEW

For the previous Phase I ESA completed in July 2017, BrightFields reviewed Sanborn® fire insurance maps, United States Geological Survey (USGS) topographic maps, and aerial photographs of the study area and surrounding properties in an effort to identify previous property uses that may pose potential environmental hazards. For this Phase I ESA Addendum,

BrightFields reviewed USGS topographic maps and aerial photographs of the Ramp I Realignment Area and surrounding properties to the north of the Ramp I Realignment Area in an effort to identify previous property uses that may pose potential environmental hazards. The project area to the south of the Ramp I Realignment Area was previously evaluated in the Phase I ESA report for the I-80 project dated July 2017. Review of the Sanborn® maps obtained for the previous Phase I ESA indicates that Sanborn® maps are not available for the Ramp I Realignment Area and surrounding properties to the north.

4.1 Topographic Maps

Historic topographic maps were reviewed to identify land use and areas of potential land disturbances within the Ramp I Realignment Area and on the surrounding properties to the north of the Ramp I Realignment Area. The following paragraphs summarize the review of the historic topographic maps. Copies of the topographic maps reviewed are included as Appendix C.

USGS 15 Minute Series Topographic Quadrangle-Delaware Water Gap, PA-1893

The Ramp I Realignment Area and the adjacent properties to the north were depicted as vacant land. Pocono Creek was depicted within the Ramp I Realignment Area.

USGS 15 Minute Series Topographic Quadrangle-Delaware Water Gap, PA-1936

An unimproved roadway was indicated to be present crossing the Ramp I Realignment Area (running generally from north to south). No other significant changes were evident to the Ramp I Realignment Area or to the adjacent properties to the north.

USGS 15 Minute Series Topographic Quadrangle-Delaware Water Gap, PA-1942

No significant changes were evident to the Ramp I Realignment Area or adjacent properties to the north.

USGS 7.5 Minute Series Topographic Quadrangle-Stroudsburg, PA-1955

Flagler Run, a tributary to Pocono Creek, was depicted within the Ramp I Realignment Area. The unimproved roadway previously depicted crossing the Ramp I Realignment Area was no longer depicted. No other significant changes were evident to the Ramp I

Realignment Area. Structures and roadways indicative of an existing residential neighborhood were present to the north of the project area. No other significant changes were evident to the adjacent properties to the north.

USGS 7.5Minute Series Topographic Quadrangle-Stroudsburg, PA-1968

No significant changes were evident to the Ramp I Realignment Area. A structure indicative of an existing furniture store building was present on previously vacant land to the northwest of the Ramp I Realignment Area. No other significant changes were evident to the adjacent properties to the north. I-80 was present to the south of the Ramp I Realignment Area.

USGS 7.5Minute Series Topographic Quadrangle-Stroudsburg, PA-1973

No significant changes were evident to the Ramp I Realignment Area or adjacent properties to the north.

USGS 7.5Minute Series Topographic Quadrangle-Stroudsburg, PA-1992

No significant changes were evident to the Ramp I Realignment Area or adjacent properties to the north.

4.2 Aerial Photographs

Aerial photographs were reviewed to identify previous land uses and areas of potential land disturbances within the Ramp I Realignment Area and on the surrounding properties to the north of the Ramp I Realignment Area. Aerial photographs are included as Appendix D and are summarized in the following paragraphs.

1957- The Ramp I Realignment Area appeared to consist of vacant land and Pocono Creek. The land surface on the adjacent property to the northwest was disturbed, possibly indicative of construction activities. Structures and a roadway indicative of an existing residential neighborhood were present to the north. The adjacent properties to the northeast were vacant.

1976- No significant changes were evident to the Ramp I Realignment Area. A structure indicative of an existing furniture store building was present to the northwest. No other significant changes were evident to the adjacent properties to the north.

1999- No significant changes were evident to the Ramp I Realignment Area. An additional structure, indicative of an existing vacant warehouse building, was present on the adjacent property to the northwest, southeast of the previously existing furniture store building. A structure indicative of an existing gym building (Retro Fitness) was present adjacent to the north on previously vacant land. No other significant changes were evident to the adjacent properties to the north.

2013- No significant changes were evident to the Ramp I Realignment Area or the adjacent properties to the north.

5.0 FIELD ASSESSMENT

5.1 Summary of PADEP Files

As indicated in Section 3.0, the EDR Radius Map™ Report obtained for this Phase I ESA Addendum did not identify any sites within or adjacent to the Ramp I Realignment Area that could represent potential environmental areas of concern.

The EDR Radius Map™ Report identified four LUST sites (Hoffner Oil, JC Penny 17794, Mikels Motors Inc., and Tristate News Dealers Supply Co.) within a 0.25-mile radius to the north of the Ramp I Realignment Area. BrightFields submitted an informal file review request to PADEP for these sites on April 4, 2019 and reviewed the files at the PADEP Northeast Regional Office in Wilkes-Barre, Pennsylvania on May 14, 2019.

The PADEP files reviewed and information obtained from the PADEP Environment Facility Application Compliance Tracking System (eFACTS) website indicate that the Hoffner Oil site was incorrectly mapped by EDR and is actually located approximately 1.5 miles northwest of the Ramp I Realignment Area at 1550 PA Route 611. Therefore, a description of the files associated with the Hoffner Oil site is not required for this Phase I ESA Addendum. The files obtained from the PADEP for the three remaining LUST sites are summarized in the following sections and copies of the files are included as Appendix B.

5.1.1 JC Penny 17794

The JC Penny 17794 site is located approximately 0.21 mile northwest of the Ramp I Realignment Area at the Stroud Mall in Stroudsburg.

The PADEP files reviewed indicate that a 4,000-gallon heating oil UST was removed from the JC Penny 17794 site by Pagano Mechanical Contractors, Inc. (Pagano) on April 20, 1993. During the removal, it was discovered that heating oil had been leaking from corroded piping for the UST resulting in soil contamination. Pagano then removed approximately 200 tons of petroleum impacted soils. Schnabel Environmental Services, Inc. (Schnabel) was contracted to perform site characterization activities. Schnabel prepared a Site Characterization Report (SCR) for the site in September 1993. The SCR concluded that the risk for groundwater contamination resulting from the release was low but a significant amount of petroleum contaminated soil remained. In September 1994, Schnabel submitted a Remedial Action Plan (RAP) for the site proposing the removal of the impacted soils. It was estimated that an additional 1,200 to 1,600 cubic yards of impacted soils would need to be removed to achieve a remediation goal of residual total petroleum hydrocarbon (TPH) concentrations below 200 milligrams per kilogram (mg/kg). The RAP was approved by the PADEP on September 22, 1994. Schnabel then proceeded to excavate a total of 2,322 tons of impacted soils for disposal. Due to structural concerns regarding the building at the site, some impacted soil with TPH concentrations above 200 mg/kg was left in place beneath the building.

RT Environmental Services, Inc. (RT) was then contracted to perform additional investigation. The purpose of the additional investigation was to determine the extent of impacted soil beneath the building and determine the risk associated with the remaining impacted soils. Four quarters of groundwater monitoring from existing monitoring wells at the site was performed by RT. The additional investigation activities performed by RT were documented in a Remedial Completion Report dated January 1996. Based on the results of the additional investigation, RT made the following conclusions:

- The source of petroleum hydrocarbon contamination had been removed;
- Migration of the low-level contamination remaining beneath the building is unlikely because the contamination is capped by the building;
- Human and ecological health is not threatened;
- No impact to groundwater was detected; and,

- No further remediation was necessary.

On May 29, 1996, RT performed an additional soil boring investigation at the request of the PADEP. Two additional horizontal soil borings were advanced in the area of the former heating oil tank. The borings (SB-1 and SB-2) were advanced to depths of 19.5 feet bgs and 23 feet bgs, respectively, at an angle of 40 degrees. Soil samples were collected from the borings at five foot intervals and the samples were screened using a photoionization detector (PID). PID readings in both borings ranged from 0 parts per million (ppm) to 25 ppm. The soil samples with the highest PID readings were submitted to laboratory analysis. The samples were analyzed for semivolatile organic compounds (SVOCs) and synthetic precipitation leaching procedure (SPLP) for SVOCs. The samples results indicated that no regulated compounds were detected in the samples above regulatory criteria. Based on the result of the investigations performed by RT, RT recommended no further action at the site.

The PADEP responded in a letter dated August 15, 1996 approving the request for site closure.

5.1.2 Mikels Motors Inc.

The Mikels Motors Inc. site is located approximately 0.14 mile north of the Ramp I Realignment Area at 1061 North 9th Street in Stroudsburg.

BrightFields reviewed a UST Closure Report for the site prepared by Pagano. The closure report indicates that a 1,000-gallon gasoline UST and a 1,000-gallon waste oil UST were removed from the site in April 1994. The closure report indicates that contaminated soil was encountered, excavated, and stockpiled on site. Soil samples were collected after the contaminated soil was excavated. The soil samples were analyzed for TPH, benzene, toluene, ethylbenzene, and xylenes (BTEX). The results indicated TPH and BTEX were present at concentrations below the regulatory criteria.

On October 4, 1994, the PADEP responded in a letter that the closure report was found to be deficient. Based on the files reviewed, it does not appear that the deficiencies were corrected.

The samples collected at the Mikels Motors Inc. site were analyzed by Hess Environmental Labs. In a memo dated April 21, 2005 the PADEP noted that the United States Attorney General completed an investigation of Hess Environmental Labs and determined that fraudulent sample results were provided to their clients between 1988 and 1997. Therefore the PADEP would not

be able to close sites in which closure relied on samples from Hess Environmental Laboratories and the PADEP indicated that additional soil sampling at the site would be required.

No additional documents were provided by the PADEP which indicate that additional sampling was performed.

5.1.3 Tristate News Dealers Supply Co.

The Tristate News Dealers Supply Co. site is located approximately 0.16 mile north of the Ramp I Realignment Area.

BrightFields reviewed a UST closure report for the site prepared by Carbon Service Corp. dated September 1991. The report indicates that two 1,000-gallon gasoline USTs were removed from the property on August 26, 1991. Soil samples were collected at the time of removal and analyzed for TPH and BTEX.

The PADEP responded to the closure report in a letter dated January 10, 1994. The closure report indicated that significant soil contamination was present at the site and therefore further remediation would be required.

The samples collected at the Tristate News Dealers Supply Co. site were analyzed by Hess Environmental Labs. In a memo dated April 21, 2005 the PADEP noted that the United States Attorney General completed an investigation of Hess Environmental Labs and determined that fraudulent sample results were provided to their clients between 1988 and 1997. Therefore the PADEP would not be able to close sites in which closure relied on samples from Hess Environmental Laboratories and the PADEP indicated that additional soil sampling at the site would be required.

No additional files were provided by the PADEP indicating that further remediation was performed.

5.2 Site Visit

The purpose of the site visit was to visually evaluate the Ramp I Realignment Area and surrounding properties in an effort to identify visual indicators of potential waste disposal concerns. BrightFields conducted the site visit on April 8, 2019. Photographs from the site visit are included in Appendix E. A map depicting the locations and view directions for each of the

photographs is also included in Appendix E. The Ramp I Realignment Area was observed to consist of vacant wooded land, a portion of Pocono Creek, and a portion of Flagler Run. No potential waste disposal concerns were identified other than some dumped trash observed in the area. No signs of USTs or other potential environmental concerns were observed.

6.0 FINDINGS

The USGS topographic maps and historic aerial photographs reviewed did not indicate any previous land uses of the Ramp I Realignment Area adjacent properties that would indicate potential waste disposal concerns. Additionally, no visual indicators of potential waste disposal concerns were identified during the site visit performed on April 8, 2019 except for some trash that has been dumped in the area.

The EDR Radius Map™ Report obtained for this Phase I ESA Addendum did not identify any additional sites within or adjacent to the Ramp I Realignment Area that that could represent potential environmental areas of concern.

Several LUST sites (Hoffner Oil, JC Penny 17794, Mikels Motors Inc., and Tristate News Dealers Supply Co.) were identified within a 0.25-mile radius to the north of the Ramp I Realignment Area. BrightFields submitted an informal file review request to PADEP for these sites on April 4, 2019 and reviewed the files at the PADEP Northeast Regional Office in Wilkes-Barre, Pennsylvania on May 14, 2019. The PADEP files reviewed and information obtained from the PADEP Environment Facility Application Compliance Tracking System (eFACTS) website indicate that the Hoffner Oil site was incorrectly mapped by EDR and is actually located approximately 1.5 miles northwest of the Ramp I Realignment Area at 1550 PA Route 611. Therefore, a description of the files associated with the Hoffner Oil site is not provided for this Phase I ESA Addendum. Based on the files reviewed, the three remaining LUST sites do not represent potential environmental concerns for the Ramp I Realignment Area. No further action is required at this time. However, if these sites are disturbed during I-80 improvements, further investigation may be warranted.

Eight sites (not including the LUST sites) were identified within a 0.25 mile radius to the north of the Ramp I Realignment Area. Based on information reviewed, the eight sites do not represent potential environmental concerns for the Ramp I Realignment Area. No further action is required at this time. However, if these sites are disturbed during I-80 improvements, further investigation may be warranted.

Several sites were also identified to the south of the Ramp I Realignment Area, however, these sites were previously evaluated in the Phase I ESA report completed in July 2017.

7.0 RECOMMENDATIONS

Based on the findings of this Phase I ESA Addendum, no further investigation at this time is recommended for the Ramp I Realignment Area. However, as recommended in the Phase I ESA report for I-80 dated July 2017, surveys for asbestos containing materials (ACM) and lead based paint (LBP) should be conducted on any structures that will be impacted by the project.

As indicated in the Phase I ESA report for I-80 dated July 2017, there is potential for contamination to be present beneath the I-80 corridor (or adjacent to the I-80 corridor) as a result of vehicle accidents and spills. Additionally, Sanborn® maps indicate that a railroad corridor was formerly located in many areas where I-80 currently is located and there is potential for contaminated materials, including historic fill, to be present beneath I-80 and/or adjacent to I-80. After the design plans for the project are completed, a Waste Management Plan (WMP), and a site specific Health and Safety Plan (HASP) should be prepared to address soil, sediment, and groundwater management, environmental health, and worker safety during all project construction activities. The WMP should address all known or suspected contaminants that may be associated with the identified sites of potential concern as well as contaminants that may be present beneath or adjacent to I-80.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>CVS PHARMACY #1312</i> EPA ID:: PAR000531301	<i>1111 N NINTH ST</i>	<i>NW 1/8 - 1/4 (0.132 mi.)</i>	<i>C13</i>	<i>35</i>

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

PA HIST LF: The report provides facility information recorded in the Pennsylvania Department of Environmental Protection ALI database. Some of this information has been abstracted from old records and may not accurately reflect the current conditions and status at these facilities.

A review of the PA HIST LF list, as provided by EDR, has revealed that there is 1 PA HIST LF site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

PA ARCHIVE UST: The list includes tanks storing highly hazardous substances that were removed from the DEP's Storage Tank Information database because of the Department's policy on sensitive information. The list also may include tanks that are removed or permanently closed.

A review of the PA ARCHIVE UST list, as provided by EDR, and dated 12/03/2018 has revealed that there are 11 PA ARCHIVE UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 12 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.25 miles of the target property.

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

FINDS:

Registry ID: 110001007099

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- . Waste code: D002
- . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSLEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: K051
. Waste name: API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY

. Waste code: K052
. Waste name: TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Historical Generators:

Date form received by agency: 05/08/1987
Site name: GRAY CHEVROLET
Classification: Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/06/2019	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites

Brownfields are generally defined as abandoned or underused industrial or commercial properties where redevelopment is complicated by actual or perceived environmental contamination. Brownfields vary in size, location, age and past use. They can range from a small, abandoned corner gas station to a large, multi-acre former manufacturing plant that has been closed for years.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300
