Qualifications of Investigators

Allison N. Brewer, Archaeological Principal Investigator

M.A., Anthropology (Archaeology track), University of Denver, 2010

B.S., Anthropology (Archaeology track), Geology minor, Mercyhurst College, 2005

Meets the Secretary of the Interior's Professional Qualifications Standards for Archaeology (36CFR§61)

Occupational Safety and Health Administration Hazardous Waste Operations and Emergency Response Worker Training Certification (29CFR§1910.120)

Ms. Brewer has over 9 years of professional experience in the excavation of archaeological sites, report writing, and lab work. Ms. Brewer has extensive experience in the survey and excavation of Phase I, II, and III sites in Pennsylvania, Virginia, Delaware, Ohio, Colorado, and Texas. Work on these projects has allowed her to become skilled in supervising and training undergraduate students, professionals, and volunteers. She has directed fieldwork on historic archaeological sites including Civil War encampments and forts, 19th century Canal sites, and 19th and 20th century farmsteads in Pennsylvania and Virginia. Her prehistoric experience includes directing fieldwork on deeply stratified and upland sites in Pennsylvania and Virginia. Her areas of expertise include supervising field projects, mapping with precision surveying instruments, research, technical report writing and report production, and proposal writing. Ms. Brewer also has experience in archeological monitoring, predictive model creation, and the conservation and curation of historic and prehistoric artifacts. Prior to joining the McCormick Taylor Cultural Resource Group Ms. Brewer worked with Alpine Archaeological Consultants, Inc. as a field technician. Ms. Brewer was also a research assistant at the University of Denver and at the Mercyhurst Archaeological Institute, R. L. Andrews Center for Perishable Analysis.

Shannon Silsky, Archaeological Field Director

B.A., Anthropology (Archaeology Track), Millersville University, 2012

A.A., Social Sciences, Harrisburg Area Community College, 2006

Occupational Safety and Health Administration Hazardous Waste Operations and Emergency Response Worker Training Certification (29CFR§1910.120)

Mr. Silsky has six years of professional experience conducting archaeological surveys in Pennsylvania, Virginia, Delaware and Ohio. He has worked on pre-contact and historic archaeological sites, and has experience on Phase I Archaeological Identification Surveys, Phase II Archaeological Evaluation Investigations, and Phase III Archaeological Data Recovery Investigations. He has been with McCormick Taylor since 2008.

Steven E. Barry, R.P.A., Cultural Resources Group Leader, Lead Archaeologist

M.A, Anthropology, University of Alabama, 2004

B.A., Anthropology, Pennsylvania State University, 1999

Meets the Secretary of the Interior's Professional Qualifications Standards for Archaeology (36CFR§61)

Member of the Register of Professional Archaeologists

Occupational Safety and Health Administration Hazardous Waste Operations and Emergency Response Worker Training Certification (29CFR§1910.120)

Mr. Barry has over 15 years of professional experience in the excavation of archaeological sites, report writing, research and lab work for prehistoric and historic archaeological research in the Mid-Atlantic region, Southeastern U.S., Southwestern U.S. and Central America. In addition, Mr. Barry has extensive experience in supervising, managing and coordinating on

transportation projects involving archaeology and cultural resources. He has worked on a variety of prehistoric and historic archaeological sites in Pennsylvania, Virginia, Delaware, Ohio, Colorado, Alabama and Belize. His areas of expertise include Federal and State Regulations regarding cultural resources, project management, supervising field projects, archaeological survey techniques, lithic analysis, research, grave relocation, reinterment, and technical report writing and production. Mr. Barry is a former PennDOT Cultural Resource Qualified Professional and remains qualified to serve in that capacity. Prior to joining the McCormick Taylor Cultural Resource Group Mr. Barry worked with the Pennsylvania Department of Transportation as a Cultural Resource Qualified Professional in Districts 5-0 & 8-0. Mr. Barry was also a Culture Resource Assistant at the University of Alabama's Office of Archaeological Research.

Cristie L. Barry, Archaeology Laboratory Director, Curation Manager

M.A., Museum Studies, Johns Hopkins University, 2010

B.A., Anthropology, Indiana University of Pennsylvania, 2005

Ms. Barry has over ten years of professional experience in archaeological research in the Middle Atlantic region. She has experience with archaeological field work as well as extensive experience with archaeological curation methods pertaining to both historic and prehistoric sites. She is knowledgeable in the most up-to-date methods of processing, caring for, and storage of artifacts for long-term curation and preservation. Ms. Barry has worked at the Flight 93 National Memorial with the National Park Service where she was involved with the curation of tributes left at the temporary memorial and was also involved in the planning of the permanent National Memorial. In addition, Ms. Barry was a supervisor for the IUP/Penn DOT Curation Project where she was involved in the curation of archaeological collections through all stages of the process.

Charles A. Richmond, Architectural Historian

M.A., American Studies, Pennsylvania State University, 2000

B.A., History and Political Science, Thiel College, Pennsylvania, 1992

Meets the Secretary of the Interior's Professional Qualifications Standards for Architectural History (36CFR§61)

Mr. Richmond has 18 years of experience in historic preservation research, inventory, and evaluation of above ground historic resources for the National Register of Historic Places. Mr. Richmond has conducted research for both historic structures and archaeological projects. In addition, he has conducted research to establish historic contexts for cultural resource studies throughout the Mid-Atlantic region. Mr. Richmond has also produced other cultural resource documents such as Historic Resource Survey reports, Determination of Effect reports, National Register Nomination Forms, and state-level recordations. Mr. Richmond has extensive experience in historic preservation projects in Pennsylvania, Delaware, Maryland, Ohio, New Jersey, North Carolina Virginia, and Washington, D.C.

COMMENTS Deposits associated with an abandoned industrial building north of the abandoned RR bed/current I-80 corridor. The industrial building was constructed ca. 1916 and was identified on historic mapping as the Perfection Shoe Machinery Co. (Sanborn 1923). By 1930, the industrial building was owned/operated by the Stroudsburg Silk Co., Inc. (Sanborn 1930). The industrial building was subsequently owned/operated as the Yankee Silk Mills (Sanborn 1930-1950).

COMMENTS Lenox St. was established between 1897 and 1905 (see 1897 and 1905 Sanborn maps). The majority of the recovered historic artifacts likely represent field scatter from earlier farming activities. The area was settled during the mid to late 18th century, with Stroudsburg being established in 1815.

ATTACHMENTS:

Hollinshead Cemetery – Description and Narrative History

The Hollinshead Cemetery is located on the north side of Dreher Avenue and bound on the west side by the house at 1228 Dreher Avenue. The cemetery is surrounded by a grove of mature trees on all sides except to the front, and it is enclosed with an ashlar limestone wall evidently erected in the late nineteenth/early twentieth century. The wall is topped with a poured concrete cap. The exterior face of the wall has a grapevine mortar joint, but the interior face of the wall has a flat mortar joint. There is a single, centrally located entrance along the south side facing onto Dreher Avenue. The entrance faces directly onto the Stroud Hollinshead monument, nearly centrally located within the cemetery. Six concrete slab steps lead up a small slope to the cemetery from Dreher Avenue.

There are 14 marked graves in the Hollinshead Cemetery, and there are likely many more which are unmarked. Generally, the stones are lined in two rows, both facing east. The Stroud J. Hollinshead (1799-1864) obelisk is set at the south end of the cemetery between the two rows. Of the marked graves, ten are for the Hollinshead family, two for the Van Vliet family and two for the Stroud family. One additional stone present within the cemetery is a fieldstone with no markings. Evidently the burial ground was begun in the late eighteenth century when it was known as Kiser's Burying Ground (Hollinshead Cemetery file at Monroe County Historical Society).

According to records of the Monroe County Tax Office, the Hollinshead Cemetery has no owner. However, the Monroe County Historical Society appears to have taken over responsibility for the cemetery's upkeep. The first known record of the cemetery is when George Malvin, administrator of the Sarah Stroud Hollinshead estate, deeded the 213-acre Hollinshead farm property to Henry Kautz in 1853, the burial ground "on the right side of the road leading to Stroudsburg" was not included within the tract (Monroe County Deed Book 7: 562). The deed stated, "excepting and reserving however the family burying ground." The measurements given in the deed for the cemetery were for a rectangle measuring 65 feet by 110 feet. The actual cemetery enclosed with a stone wall is 28.7 feet x 50.2 feet. It is unknown whether the larger size denoted on the deed was designated to allow for the possible inclusion of future graves or whether it was believed that unknown burials were located within the larger parcel. The stone wall, which encompasses all visible grave markers, was not added until the late nineteenth/early twentieth century. No markers or depressions were observed outside of the stone wall that would suggest the presence of additional graves.

The earliest tombstone is for Dirck Van Vliet, born in 1699 and died in 1774. Dirck's wife Rachel Van Keuren is also buried there. She was born in 1707 and died in 1787. A native of Amsterdam, Van Vliet came to the Minisink region of northeastern Pennsylvania by way of Esopus, present-day Kingston, New York, on the Hudson River. Apparently by the 1740s Van Vliet had settled in the area of present-day East Stroudsburg, where he and his wife Rachel had twelve children (Van Vliet family file at Monroe County Historical Society). In 1760 he purchased 300 acres west of present-day Stroudsburg, and it was on this land that he was buried (Hollinshead Family file at

Monroe County Historical Society). A single twentieth century cast metal plaque attached to a small granite slab now marks their graves.

John Stroud and Sarah Stroud Hollinshead, two of the children of Colonel Jacob Stroud, founder of Stroudsburg, and buried within Hollinshead Cemetery. The grave of John Stroud, who died in 1814, aged 45 years, is marked with a plain, weathered marble headstone. The grave of his wife Elizabeth Dupuy (1776-1815) is commemorated similarly. Dr. James Hollinshead (1768-1831) and his wife Sarah Stroud (1770-1853) are memorialized with white marble stones with curvilinear crests.

The simple marble headstone for John Stroud (1768-1814), eldest son of Colonel Jacob Stroud, belies the fact that during his lifetime he lived in two of the finest houses of the region. The first is the three-and-a-half story Georgian style mansion at 900 Main Street, Stroudsburg, which was listed in the National Register in 1979. Later he moved to the stone farmhouse that became the Glen Brook Country Club. Both houses had been built by his father, Jacob Stroud.

Sarah Stroud, the fourth child of Jacob Stroud (1735-1806), married Dr. James Hollinshead in 1794. Sarah and her husband occupied the residence at 1303 Dreher Avenue, constructed for her by her father c. 1800. Following Jacob's death, Sarah inherited the farm with the "houses, out houses, edifices, and buildings thereon erected" (Monroe County Deed Book 5: 602). As indicated above, following Sarah's death in 1853, Henry Kautz purchased the farm in 1856 from the Hollinshead heirs (Monroe County Deed Book 7: 562).

The small cemetery is dominated by the marble obelisk for Stroud Jacob Hollinshead (1799-1864). The marble obelisk for Stroud J. Hollinshead is a fitting monument to one of Stroudsburg's movers and shakers of the time. Born in the Stroud-Hollinshead House (1303 Dreher Avenue), Stroud built the old Stroudsburg House, later the Penn-Stroud Hotel, in Stroudsburg, which he operated for many years. In 1836 he donated the present site for the Monroe County Courthouse as well as the portion of Franklin Street that extends from Main Street to the courthouse. He also was one of the organizers of the Stroudsburg Bank in 1857 (Bell 1927:7). The 1860 population census for Stroudsburg notes Stroud J. Hollinshead, aged 59, as a farmer with \$34,340 worth of real estate and \$16,600 worth of personal estate, making him a well-to-do man of the time in Stroudsburg. A Revolutionary War veteran's marker and American flag adjoins his grave; however, based on his lifespan his service in this war is not possible. It is unknown what war he may have served in. His burial appears to document the last marked grave in the cemetery.

In 1948 Hollinshead descendants agreed to pay \$341.00 for the restoration of the wall around the Hollinshead Cemetery. As part of that agreement, a new concrete coping was to be placed on top of the wall and the front wall was to be refaced (Hollinshead Family file at Monroe County Historical Society). The Monroe County Historical Society was to supervise the project. According to a receipt at the historical society, work on the

cemetery was completed by September 1949 with Aaron T. Smith being the masonry contractor.

14. Updated PASS Information: Please complete an updated PASS form **for each site** reported by this report. Updated forms need only include the new information and the site number and name.

15. PASS Site Specific Information: In addition, the following pages must also be completed **for each site**. Complete only the portions that pertain to the current report. If the report is a stand-alone Phase II, you do not need to fill in the Phase I methods, since they should have been included in the summary form for the previous report.

15. PASS Site Specific Information

Please complete the following **for each site** reported by this report.

PASS NUMBER 36MR0247

A. Phase I Methods (how the site was located - check as many as apply)

- shovel tests controlled test units/deep tests
 surface survey informant interview
 other: grave markers were mapped and recorded; Cemetery Main Survey Form

B. Phase II Methods

- controlled surface collection
 controlled excavation w. screening of plowzone, > 5 units
 mechanical stripping of plowzone (%)
 deep excavation units
 remote sensing
 other:

square meters of site tested: sq m

% of site area tested: %

C. Phase III Methods

- controlled surface collection
 controlled excavation w. screening of plowzone, > 5 units
 mechanical stripping of plowzone %
 deep excavation
 block excavations
 remote sensing
 environmental reconstruction (soils, floral, pollen)
 dietary reconstruction (floral, faunal)
 intensive lithic analysis (functional)
 intensive lithic analysis (technological)
 raw material sourcing
 ceramic analysis (seriation)
 ceramic analysis (functional)
 blood residue
