

Project Context and Corridor Plan

⚠ This section of I-80 has been designated as a “safety corridor.”

The 2009 I-80 Corridor Study identified this project as the next stage of improvements to I-80 between the Delaware River and I-380.

This project was prioritized as the next step of corridor improvements due to:

- High traffic volumes.
- Higher crash rates.
- Deteriorated condition of roadway and bridges.

PennDOT, the Federal Highway Administration, and Northeastern Pennsylvania Alliance are planning for I-80 improvements east and west of the project area.
